SUMMARY

Frontend Developer with 2 years of experience building responsive web applications using React.js and JavaScript. Developed reusable UI components, implemented JWT-based authentication, and delivered mobile-friendly interfaces. Experienced in collaborating with backend teams to integrate REST APIs.

SKILLS

React.js, JavaScript (ES6+), HTML5, CSS3, Material-UI, Responsive Design, React Testing Library, Git, GitHub, VS Code, MongoDB

EXPERIENCE

Software Engineer (Frontend) | 05/2023 – 05/2025

Lyros Technologies Pvt. Ltd. | Hyderabad, Telangana

- Built and maintained responsive React.js web applications with reusable component architecture, enhancing UI consistency and user experience across the product.
- Designed clean, accessible user interfaces with Material-UI and custom CSS, ensuring seamless cross-device compatibility on mobile and desktop.
- Integrated REST APIs into frontend views to fetch and display dynamic data, collaborating with backend developers to optimize data flow.
- Implemented JWT-based authentication UI including login forms, role-based screen access, and client-side session handling.
- Wrote clean, maintainable JavaScript (ES6+) code and participated in code reviews to maintain quality standards.

PROJECTS

Move-N-Earn – Parcel Delivery Web Application | 03/2024 – 02/2025

React.js, JavaScript, Material-UI, JWT, REST API, MongoDB

- Built the complete frontend for a parcel delivery platform, including login, dashboard, and role-specific views for enterprise and delivery partner users.
- Designed and implemented a secure login page with real-time form validation, “Remember Me” toggle, and JWT token handling on the client side.
- Created role-based UI rendering so enterprise users and delivery partners see different screens after login, improving usability and security.
- Ensured full mobile responsiveness using CSS media queries and Material-UI Grid, tested across screen sizes from 320px to 1440px.

EDUCATION

B.Tech, Computer Science Engineering

Sree Vahini Institute of Science & Technology | Tiruvuru, AP

CERTIFICATIONS

- Claude Code in Action – Anthropic, 03/01/26. Official certification in AI-powered coding workflows and integrating Claude AI into software development pipelines.
- Tata GenAI Powered Data Analytics – Forage, 08/01/25. Exploratory data analysis using GenAI tools, predictive modeling framework for financial risk assessment.
- Tata Cybersecurity Security Analyst – Forage, 08/01/25. Identity & Access Management (IAM), cybersecurity best practices.
